

nVent ERIFLEX Customized and Engineered Solutions

nVent ERIFLEX offers the necessary products and engineering support needed to specify and build a complete range of solutions for energy, transportation, construction and applications where low voltage power storage and transmission are critical. Our engineering team brings years of experience and expertise to every project, and will be with you from start to finish to advise on:

Standardized and customized product solutions

Engineering and prototype installation support

Global standards compliance

Post-installation support

DESIGN FLEXIBILITY, IDEATION AND PROTOTYPING

Work with the nVent team to build a customized, compact low voltage power distribution panel solution that is safe, reliable, enables design flexibility and lowers the cost of implementation.

Have a need or requirement for an application? Submit a request and we will collaborate with your engineering team to find the best solution.

The team will collaborate from design concept to prototype to ensure the final design is able to be manufactured.

Once the design is finalized, the sales team will work with supply chain to ensure we meet the forecasted demands.

SUPPORTING CUSTOMERS FROM DESIGN TO MANUFACTURING TO ONGOING MAINTENANCE

nVent ERIFLEX offers worldwide, high-volume manufacturing of these customized product solutions, with local warehouse stocking in your region. Not only will the team help with engineering and ordering, but will also remain on the project through installation and ongoing maintenance.

For upfront and ongoing training on nVent ERIFLEX, our team offers lunch and learns, engineering webinars and virtual presentations regarding nVent product offerings and benefits. In addition, our technical team can be on-site to perform application specific training.
