

**CABLERACK**

CABLERACK is used for ladder or basket tray mounting and securing 19-inch rack equipment for server rooms, telecommunication rooms, and other applications. The fixed, open frame rack allows suspending 19-inch rack equipment from Ladder Rack or Basket Tray. The rack has universal tapped holes per industry standards to accommodate typical applications. These open frame racks are ideal for high-density cabling applications which require above-the-cabinet mounting of equipment, and provide maximum access to cables and equipment. In applications where equipment expands above the cabinet, CABLERACK provides ideal management with increased equipment and cable densities.
