## **List of Tables**

Table 1 Overview.....	9
-----------------------	---

## 1 Executive Summary

- **Noise measurement of the LHX+ 5kW performed**
- **The LHX+ 5kW was installed in a cabinet with defined air resistance to simulate real conditions**
  - Noise measurements were performed with closed doors @ different fan speed
  - Noise measurements were performed with open front door @ different fan speed
- **Results of the noise measurements:**
  - Results meet specifications

## 2 General Information

The actual analysis, and the actual temperature behavior, reflects the present measuring set-up.

### 3 Test purpose

In this report you will find the measurement results of the **acoustic noise measurement** (description see page 5).

The LHX+ 5kW was installed in a cabinet with defined air impedance to simulate real conditions. Furthermore the fans run at **different fan speed**.

### 4 Description of the test

The cabinet with LHX+ 5kW was placed on the floor and tested with the **sound intensity measuring method**. The cabinet was tested with closed doors as well as open front door.

The operating conditions for the fan were 40%, 50%, 60%, 70%, 80%, 90% and 100% fan speed.

## 5 Test Setup
