# S-20 and S-40

## **CONNECT AND PROTECT**

## Heat-shrink under insulation in-line splice kit 🖘

#### **PRODUCT OVERVIEW**

These splice kits are designed for the in-line joining of nVent RAYCHEM BTV, QTVR, XTVR, HTV and VPL self-regulating heating cables.

The nVent RAYCHEM S-20 kit is designed for use with BTV and QTVR heating cables and the S-40 kit is for use with XTVR, HTV and VPL heating cables.

All kits are approved for use in hazardous areas.

The splice kits employ easy to use heat-shrinkable tubing with an adhesive, that when heated, forms a semi-flexible moisture proof encapsulation. The S-40 kit is supplied with a removable caddy to make the installation quick and easy.

The S-20 kit uses crimp electrical connections, while the S-40 kit utilizes screws terminals.

Due to their low profile designs, the finished splices can be installed under the insulation, directly on the pipe.
