Built for Projects, Designed for People

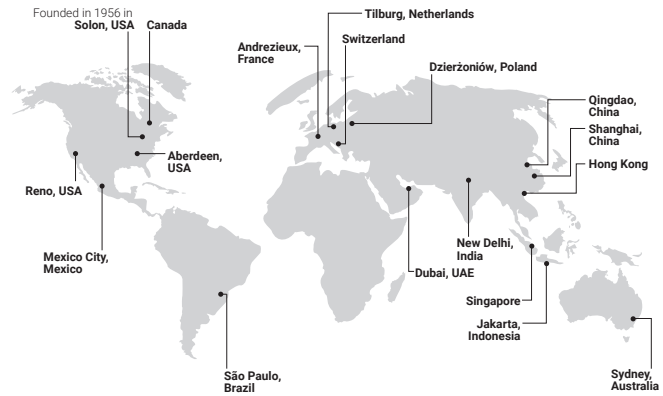

FOUNDED IN THE USA, SUPPORTED WORLDWIDE

Founded in 1956
in Solon, Ohio

nVent CADDY was founded and is based in the United States, but has a wide global footprint with manufacturing plants throughout the United States, the Netherlands, France, and other regional hubs.

With a commitment to serving the customer with the best products on the market, the nVent CADDY team maintains visibility into the manufacturing process from start to finish.

YOUR TEAM IS OUR TEAM

For decades, our product development team has worked with contractors on job sites to understand their challenges and frustrations. The team then applies these observations, developing solutions fitting contractor needs, including ways to reduce time, increase ease of and overall installation. Once a product is developed, the team validates it in the field with our customers. Over the years, nVent CADDY has created a unique relationship with our customers, even creating products named for our most loyal.

nVent CADDY application engineers and product developers spent over 330 days (and counting!) in the field identifying new ways to create efficiencies and end-user value.

THE BEST TRAINING FOR THE BEST PRODUCTS

nVent CADDY has opportunities for customers to participate in nVent CADDY School, a training session that takes place several times a year, walking users through product installation and benefits. nVent CADDY is also investing in the future by supporting new apprentices as well as those with many years in the field. The nVent CADDY team gets out of the office and into the field to do on-site training and demos for customers as well.

See what gear you can earn through the nVent CADDY Stuff Contractor Appreciation program!

Visit the Partners section on nVent.com/CADDY or contact your sales rep to get started.

Customer-Inspired Solutions

nVent CADDY's team of experts take the time to create solutions with the customer and their challenges in mind, as well as trends in the current market. Hours of research, product development and engineering goes into the nVent CADDY products customers know and love.

nVent CADDY products help customers solve problems by creating solutions for their biggest obstacles.

BUILDING CODE REQUIREMENTS

PROJECT CHALLENGES

ENVIRONMENTAL FACTORS

FIRE SAFETY

CRITICAL EQUIPMENT PROTECTION

nVent CADDY products solve for these challenges and more, while being engineered to be:

SAFE

Many injuries on the job site are the result of falls. nVent CADDY products are designed to move a significant amount of the work previously completed on lifts and ladders to ground level, greatly reducing the risk of injury. Tool-free components also limit the use of potentially dangerous power tools.

FAST

Every part of an nVent CADDY product is meticulously designed to reduce the amount of total installation time. This is done by making the product install quicker than its traditional counterpart as well as creating products that make it easy to prefabricate complex assemblies on the ground or offsite. Limit rework after installation and meet jobsite deadlines using innovative nVent CADDY products.

EASY

nVent CADDY products are designed to incorporate features that make installation easier. nVent CADDY products are designed to have fewer parts, secure hardware and require fewer tools. The benefits of individual products are multiplied when used together as a system solution.

Products to fit most applications including:

**ELECTRICAL • DATACOM • FIRE SPRINKLER • MECHANICAL
HVAC • PLUMBING • ROOFTOP • SEISMIC BRACING**

HVAC and Refrigeration Solutions

From reliable environment control to proper air and fluid circulation, HVAC systems are critical to today's commercial and industrial buildings.

nVent CADDY is proud to support HVAC installers from end-to-end with our innovative solutions.

Whether you need to upgrade an existing installation or install comfort systems into new construction, nVent CADDY has the solutions to get the job done safe, fast, and easy.

FEATURES:

- Quick and easy installation
- Lower total installed cost
- Solutions for wet and dry side specialties, including VRF applications
- Products compliant with SMACNA, ASCE and IMC standards

Buy American Compliant Solutions are available.

HVAC Industry Leadership

nVent CADDY is proud to support and contribute to the HVAC industry, ensuring a safe and compliant future for contractors and installers. nVent CADDY is affiliated with many leading industry organizations, contributing thought leadership, real-world engineering expertise and code and compliance insights.

Online Education, Keeping You Up-to-Date

nVent CADDY is committed to industry leadership through video content and educational courses.

Engineering and Support – Seismic Bracing

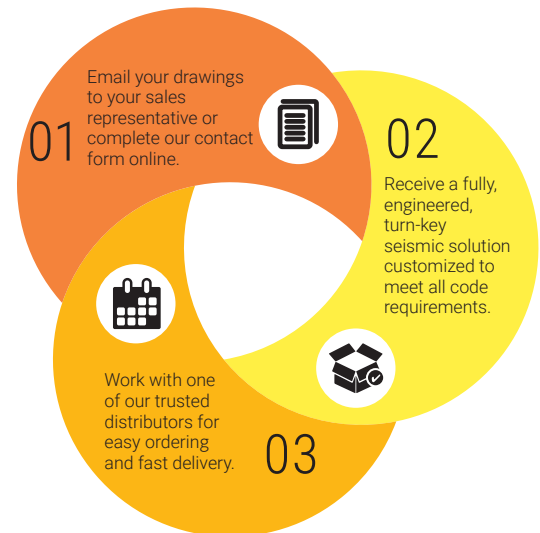

The nVent CADDY team makes seismic simple by:

- Working with you to design a turn-key, fully engineered, complete bracing system that meets your needs
- Identifying the appropriate products from the broad offering
- Offering compatible fixing, fastening and support products
- Explaining installation techniques and tips to meet the evolving codes and standards requirements

From design to construction to inspection, we keep our process transparent to ensure a full understanding of the final bracing installation, whether it requires cable or rigid bracing solutions.

We make seismic simple.

Engineering and Support – Wind Anchoring

Wind anchoring meets ASCE 7 & IMC 301.15 standards

nVent CADDY makes rooftop anchoring simple – from engineering and system design, to premium, easy-to-use and install components.

- Engineering services for design and layout support, with PE-stamped drawings for all 50 states
- Industry-leading rooftop supports for a full range of applications
- Stainless steel cable bracing kits and solutions that allow for design flexibility
- Anchors for any substrate that work seamlessly with your rooftop system and ensure your warranty is preserved

Rooftop Solutions

nVent CADDY Pyramid rooftop supports are a surface mounted solution for supporting equipment and lines on a variety of roof surfaces. They offer superior load distribution and dramatically reduce installation time by replacing slow, heavy, and labor-intensive methods.

These supports are specifically designed for rooftop applications with UV stabilization for long service life and unique materials that protect roof membranes.

The nVent CADDY Pyramid Rooftop Anchor System helps ensure the safety and protection of your rooftop mechanical, electrical, and HVAC equipment applications. The system fastens directly to the roof deck and secures equipment and systems in place.

FEATURES:

- Install on most any roof surface - single ply, bituminous, metal and spray foam
- UV stabilized for long lasting performance
- Anchor system requires minimal roof membrane penetration

Seismic Bracing Solutions

Earthquakes and similar events pose a direct risk to the ongoing operations of government, businesses, and public infrastructure. To protect against these risks, building and industry codes include requirements for the design and installation of seismic bracing for non-structural components, such as HVAC, fire sprinkler, mechanical, electrical and plumbing systems.

The nVent CADDY Seismic Bracing System was developed to keep these critical building systems operational after a seismic event. Our personalized Engineering Services provide building owners and contractors with optimized design layouts and support throughout the job.

Duct Hanging Solutions

Whether installing round or rectangular duct, nVent CADDY has installation and hanging methods that can make the job easier.

From traditional strap-based installation to innovative solutions that reduce time on-site – even flexibility to prefab some or all of the duct routing on the ground before raising it into place – nVent CADDY works with contractors and installers to make sure the products used will lead to a safer, faster and easier installation than the alternatives.

Round Duct Hanging Solutions

Round ducts are increasingly seen as the most economical method for efficiently transporting air from today's high-pressure HVAC systems. With the nVent CADDY Speed Link system, long duct runs can be prefabricated with wire rope looped around the duct and held in place. Once on the jobsite, the assembly can be lifted and installed at structure with one of the end fittings attached to the wire rope.

Did you know?

Tool-Free Installation

- Push/pull keyless release requires no tools to secure the system

Highly Adjustable

- Double-sided locking mechanism enables quick and simple height adjustment

Aesthetically Superior

- Cable spread of 90 degrees allowing the device to be positioned closer to the load
- Low-profile locking device minimizes the visual impact

Duct Hanging Solutions

Rectangular ducts remain a common solution when operating in tight spaces where height is a concern. Installers utilizing wire rope, have several options when installing rectangular duct.

The new nVent CADDY Speed Link PD Duct Bracket Kit is an ideal solution that is designed to be directly attached to the duct and hung with wire rope, using the nVent CADDY Speed Link SLS System within a few seconds.

It can be used with 2 & 3 mm wire to adapt to the needs of the installers. Its unique design prevents the wire rope from being in direct contact and from damaging the duct, making it an ideal HVAC solution.

Ducts can also be prefabricated with threaded rod, two ways: attaching directly to the duct or supporting the duct via a strut trapeze (see Trapeze Solutions page). In both scenarios, nVent CADDY Rod Lock “push-to-install” technology enables easy installation of preassembled components.

When attaching directly to the duct, installers can fasten Rod Lock Duct Brackets into the side of the ductwork. Threaded rods can be preinstalled at the structure, allowing the fabricated duct assemblies to be easily lifted and locked in place.

Hanging Solutions

Traditional hangers have often been difficult to differentiate between brands, historically. Products on the market adequately hold pipe and other systems, but have not undergone any innovation in decades.

However, the nVent CADDY product development team is always working to make products faster, safer and easier to install.

Our family of products offers unique benefits to the installer and together they are designed to be the most comprehensively innovative offering on the market, lowering total installed cost.

Trapeze Solutions

nVent CADDY has a solution no matter how you choose to manufacture and install trapeze runs. From traditional methods manufactured on site with strut, rod and strut nuts to push-to-install technology that simplifies prefabrication, nVent CADDY can help.

The focus on Safe, Fast, and Easy products from the experts at nVent CADDY makes you more profitable and allows you to win more jobs. If you see an opportunity to improve your process but just cannot find that one product that will make it happen, contact your nVent CADDY Business Development Manager for help in identifying the right solution for you.

Trapeze Solutions

Retrofit installations and service contracts are valuable ongoing revenue streams. Retrofit and service solutions from nVent CADDY keep your service segment profitable through product innovation. nVent CADDY safe, fast, and easy products are a perfect fit for service trucks that need to be ready for anything when they walk onto a job. Product features that make it quick and easy to add trapeze tiers or run new lines on existing installations gets your service technicians off the job quicker meaning more jobs completed and higher revenue.

Contact your nVent CADDY Business Development Manager to learn more about product solutions we offer for retrofit and service work.
